

# MotoScan Android

Data capture App for Android mobile devices

*barcodes optimizes  
your workflow*

## Ready-made app makes all Android data capture devices complete tools

MotoScan Android is an app made explicitly for data capture tasks.

This is entry-level data capture for everyone. It is easy to understand and easy to handle.

Make your own data capture solution with MotoScan for Android handheld devices. It is ready out-of-box, and it is easy to modify and adapt the menus and texts to your needs

The most common data capture scenarios combined in a small software package that gives the end user an easy and simple handling of data collection. It's easy to interface with ERP systems as it operates with a common batch output as a plain text file. It supports integrated barcode scanners in Android devices, and will run on Android devices from version 7 and upwards

How can you use the app to support your work routines:

### Inventory tool

Inventory is the most common scenario for data capture. Get rid of pen and paper – go digital easily. A small shop/company with a potential for 1-3 terminals. - even in local language and branded with your name

### Warehouse tool

**Ship:** (Traceability) Scan batch numbers on customer orders  
**Move:** Change location of goods in stock  
**Receive:** Scan incoming goods to pair with Purchase Order

### Field Service tool

Register parts used for repairs. Service people needs to register materials used for repairs / installation at the customer's site. Type the work order no. and scan the spare parts – no paperwork needed.

## KEY FEATURES

### White label app

Brand it at your own choice

### Local language

Write text and menu's in your own language, with your own texts and headlines

### Easy to configure

No programming needed. Comes with preconfigured menu – ready to use, or change if needed.

### Demo and Trial mode

You can download an unlicensed version running in demo mode using the barcodes below. Demo mode means that you can try out the app on the device, but there is no connection to back end, no data transfer etc.

Creating an account on the website and starting a trial period (60 days), will allow you to try out the app generator and adapt the app to your needs. In trial mode, you can register and transfer one record and change and play with one configuration only for the 60-day period.

Buy the licenses online at the website or contact us directly if you are a reseller/integrator

### Validated and testet

Our software solution is validated and approved by several of the major vendors of hand held mobile computers

**Get started: Go to [www.moto-scan.com](http://www.moto-scan.com) and sign up for free 60-day trial**

Download the app on your device and connect it to your login. You can install the app directly using the staging barcodes for the different vendors of mobile computers (find them all on [www.moto-scan.com](http://www.moto-scan.com) in the download section – or use Google Play Store to install.
